In this day and age the man who waits for business to come to him is in for a disappointment. Business people over the country have found this more true in recent years.

> It is up to the man who wants business to go after it - and there is no better medium than to advertise. As time rolls on it is more noticeable that people are seeking bargains in all purchases.

Business firms everywhere have proved that business can and does keep up by consistent and persistent advertising and sales effort. But it must be consistent and values must be kept high.

> The man who makes what profit there is to make is the man who does not have to wipe off his goods on the shelf, BUT KEEPS THEM MOVING ALL THE TIME.
